

"The World is Listening!"

World Christian Broadcasting's New Station will Reach the World

From Station KNLS, in Anchor Point, Alaska, World Christian Broadcasting is speaking the gospel to about half the world's population 20 hours every day. Six acres of antenna send out 32 million watts of power from two 100,000 watt transmitters. The new antenna finished in 2005 is digital ready, capable of doing four simultaneous broadcasts. The two antennas reach about 2/3 of China, 2/3 of Russia, and the Pacific Rim countries.

Readership on our websites is growing every week. Last year, over one million hits occurred on the English, Russian and Chinese websites by over 100,000 different people. Click on www.worldchristian.org and check out our new ministry website.

Construction of our new station in the Indian Ocean is over half completed. When finished, the continents of Africa and South America, the 25 capital cities of the Middle East (where Arabic is the official language), India, Indonesia, western Russia and China will all be within our broadcast range. Now finished are the guard house, two miles of road, 1½ miles of security fence, generator building, water well, and staff home. Next to be built is the transmitter building. Earth anchors are now being placed, and the four antenna towers that have arrived on our site will soon be raised. Next will come the three 100,000 watt transmitters needed to power the antennas.

Our office in the Middle East has been opened. We have raised over \$4 million of the \$7.5 million needed for the project to be completed in the Indian Ocean. **Three billion shortwave radios** throughout the world will bring a potential listening audience of **five billion each day!**

Pray for us. Share this news with others who have an interest in making an impact upon the health, education, relationships, and, most of all, the spiritual condition of the world.
